Version no.: 01

Date: December 2019

Date of revision: 29/03/2021

Product name: HUE.VERSE CREAM DEVELOPER 40 VOL.

Section 1: Identification of the substance/mixture

Product Name:	HUE.VERSE CREAM DEVELOPER 40 VOL.
Recommended Use	Developer for Hair Colouring Product
Company Details	Evo Labs Pty Ltd
Address	17-21 Commercial St Marleston, South Australia, Australia 5000
Telephone Number	+61 8 8403 8263
Email	compliance@evohair.com
Emergency Telephone Number	Australia Poison Information centre: Phone 13-11-26 New Zealand: National Poison Information centre. Phone 0800-764-766 Global Links to Poison Centres and Clinical Toxicologists all over the World: http://www.eapcct.org/index.php?page=links

Section 2: Hazards Identification

Classification according to WHS Regulations (Australia)

Label Elements

Pictogram

GHS07

GHS03

GHS05

Signal Word

Danger

Hazard Classification

Oxidising Liquids - Category 2

Safety Data Sheet

Page 2 of 9

Version no.: 01

Date: December 2019

Date of revision: 29/03/2021

Product name: HUE.VERSE CREAM DEVELOPER 40 VOL.

Acute Toxicity (Oral) - Category 4
Acute Toxicity (Inhalation) – Category 4
Skin corrosion – category 1A
Serious Eye Damage - Category 1

Hazard Statement(s)

H271 May cause fire or explosion; strong oxidizer.
H332 Harmful if inhaled.
H302 Harmful if swallowed.
H314 Causes severe skin burns and eye damage.
H318 Causes serious eye damage.

Precautionary statement

P101 If medical advice is needed, have product container or label at hand.
P102 Keep out of reach of children.
P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P280 Wear protective gloves/protective clothing/eye protection/face protection.
P260 Do not breathe fume/gas/mist/vapours/spray.

Response statement

P301 + P330 + P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.
P303 + P361 + P353 IF ON SKIN (or hair): Remove/take off immediately all contaminated clothing. Rinse skin with water/shower.
P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P301 + P312 IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
P337 + P313 If eye irritation persists: Get medical advice/attention.

Poisons Schedule (Aust)

5

New Zealand Classification

This material is hazardous according to criteria of New Zealand EPA.
EPA Group Standard: Cosmetic Products Group Standard 2017, HSR002552

Dangerous Goods Classification

Dangerous Goods according to the criteria of the Australian Code for the Transport of Dangerous Goods by Road & Rail (ADG Code)

When used following the manufacturer's instructions, the product is considered safe for the environment and humans, within its category, and except for cases of individual hypersensitivity to one or more of the ingredients in the formulation.

The following information applies in the case of improper use or accident.

Repeated skin exposure may cause skin rash due to irritation and/or allergic reaction.

Irritating if swallowed and/or in accidental contact with eyes or mucous membranes in general.

Excessive inhalation of vapours can irritate the respiratory tract.

Section 3: Composition/information on ingredients

Ingredients	CAS No.	% (w/w)
AQUA (WATER)	7732-18-5	30%-100%
HYDROGEN PEROXIDE	7722-84-1	12%
CETEARYL ALCOHOL	8005-44-5; 67762-27-0	3%-10%
CETEARETH-20	68439-49-6	1%-3%
CETYL ALCOHOL	36653-82-4	1%-3%
ETIDRONIC ACID	2809-21-4	0,3%-1%
BENZYL ALCOHOL	100-51-6	0%-0,1%
CITRIC ACID	77-92-9; 5949-29-1	0%-0,1%
COTA TINCTORIA FLOWER/LEAF/STEM EXTRACT	n.d.	0%-0,1%
GLYCERIN	56-81-5	0%-0,1%
OXYQUINOLINE SULFATE	134-31-6	0%-0,1%
POTASSIUM SORBATE	590-00-1; 24634-61-5	0%-0,1%
SODIUM BENZOATE	532-32-1	0%-0,1%

Section 4: First Aid Measure

Description of necessary first aid measure

Swallowed: in the event of involuntary ingestion of large amounts of product, do not induce vomiting. If required, contact a poison centre, or seek medical advice.

Eyes: remove contact lenses, flush eye immediately and accurately with plenty of lukewarm water; if irritation persists, seek medical advice.

Skin: wash immediately and accurately with plenty of water. If irritation persists, seek medical advice.

Inhaled: in the event of massive inhalation of vapours, take the person outside. If irritation symptoms persist, contact a poison centre, or seek medical advice.

Section 5: Fire-Fighting measures

Type of hazard	Oxidizing.
Extinguishing media & methods	Use powder or CO2 extinguisher for small fires and atomized water or foam for large fires. Cool containers with water.
Protection Equipment for Firefighters	Wear self-contained breathing apparatus and suitable protective clothing.

Section 6: Accidental Release Measures

Collect the spilled product using cleaning cloths or sand and sawdust where possible and put into suitable containers for disposal according to the law. Wash the contaminated area with plenty of water. Never put spilled product back in the original container. Do not use spilled product.

Personal Protection	Wear self-contained breathing apparatus and suitable protective clothing.
---------------------	---

Section 7: Handling and Storage

Safe Handling Practices	Carefully follow the instructions and warnings on the package or on enclosed leaflet. Do not use for any purpose not described in the instructions. Avoid mixing with other products, similar products or products with substances other than those specified in the instructions. Never put spilled product back in the original container for reuse. Avoid product contamination during use. Keep out of the reach of children.
-------------------------	--

Health Warnings

Do not apply if the scalp is damaged, irritated or affected by disease (eczema, psoriasis, etc.).

Caution, the final product may generate hydrogen peroxide. Continuous exposure to detergents (soap, shampoo, liquid detergents), for professional reasons, may deplete the hydrolipidic film and horny layer that constitute the skin's natural barrier. The depletion of this barrier could cause skin lesions and exposure to external agents. Under these conditions, handling other products normally used during professional activities without proper precautions may cause intolerance that, in the long-term, could lead to serious irritation and allergies.

Safe Store site requirements

Store in a cool, dry, well-ventilated area (at room temperature). Do not store or use the product near open flame, sources of heat, operating electrical equipment or in direct sunlight. Do not store the product at a temperature lower than 5 °C or above 30 °C. Close container tightly after use.

Keep away from reducing agents (liquids for permanents, straighteners, colour-removing agents, etc.).

Section 8: Exposure Control/Personal Protection

Exposure Controls

Appropriate Engineering Controls:

EU requirements: The working environment must be adequately ventilated, if necessary, via mechanical ventilation systems (Title II, Legislative Decree no. 81/2008 and subsequent amendments and addenda). Areas where emissions of vapours, gases, dusts or spills of substances may occur must be separated and equipped with local extraction or collection systems (Annex IV, Point 2, Legislative Decree no. 81/08 and subsequent amendments and addenda).

Whenever the Employer identifies risks that cannot be avoided or sufficiently reduced through other means, it is required to provide employees with adequate Personal Protective Equipment (PPE) (Articles 75 and 77, Legislative Decree no. 81/2008 and subsequent amendments and addenda).

Australia & NZ: General ventilation should be adequate for normal use. For operations where the exposure limits may be exceeded, forced ventilation such as local exhaust may be needed to maintain exposures below applicable limits.

Personal Protective Equipment (PPE):

EU requirements: PPE must be compliant with the provisions of Legislative Decree no. 475/92 and subsequent amendments and addenda (Article 76, Legislative Decree no. 81/08 and subsequent amendments and addenda). The use of PPE provided by the Employer is mandatory (Article 20, Paragraph 2, and Article 78, Legislative Decree no. 81/08 and subsequent amendments and addenda).

In the specific case:

- wear disposable plastic gloves during all phases of product application, handling and final rinse.
- use carefully cleaned working tools.
- avoid tools containing nickel.
- do not wear costume jewellery.

Australia & NZ: Wear safety glasses and impervious gloves. Available information suggests that gloves made from nitrile rubber should be suitable for intermittent contact. However, due to variations in glove construction and local conditions, the user should make a final assessment.

Hygiene measures:

Avoid contact with eyes. Handle in accordance with good industrial hygiene and safety. Use proper protective equipment when involved with bulk processing.

Keep away from food, drink and animal feeding stuffs. When using do not eat, drink or smoke. Wash hands prior to eating, drinking or smoking.

Section 9: Physical and Chemical Properties

Appearance	Creamy
Odour	Characteristic

Section 10: Stability and Reactivity

Stability of the substance	Product stable at ordinary temperatures and under the indicated storage conditions.
----------------------------	---

Section 11: Toxicological Information

Oral Toxicity	Harmful if swallowed
---------------	----------------------

Safety Data Sheet

Date: December 2019

Date of revision: 29/03/2021

Product name: HUE.VERSE CREAM DEVELOPER 40 VOL.

Skin Irritation	Repeated skin exposure may cause skin rash due to irritation and/or allergic reaction.
Toxicity Inhalation	Excessive inhalation of vapours/powder can irritate the respiratory tract.
Eye Irritation	Risk of serious damage to eyes
Other Toxicity Information	EU: The need to subject workers to a health-monitoring programme (pre-hire and periodic medical examinations) must be evaluated by the doctor in charge based on the Risk Assessment Document and specific knowledge of the risk situation (Chapter III, Section IV, Legislative Decree no. 81/08 and subsequent amendments and addenda). Workers are obligated to submit to the health monitoring programme required by the doctor in charge (Article 20, Legislative Decree no. 81/08 and subsequent amendments and addenda).

Section 12: Eco-toxicity Information

Eco Toxicity	No information available for finished product.
Persistence and Degradability	No information available.
Bioaccumulation	No information available
Soil Mobility	No information available
Other Adverse Effects	No information available. Avoid contaminating waterways

Section 13: Disposal Considerations

Disposal information	No specific requirements for consumer/end users Bulk or quantity may be disposed of in a lined landfill in accordance with local regulations and according to normal commercial disposal procedures
----------------------	--

Relevant information

Packaging should be recycled after residual emptying

Section 14: Transport Information

Classification for road transport

UN Number: 2984
Proper Shipping Name: Hydrogen peroxide in aqueous solution
Hazard Class: 5.1
Packing group: III

Classification for sea transport

UN Number: 2984
Proper Shipping Name: Hydrogen peroxide in aqueous solution
Hazard Class: 5.1
Packing group: III

Classification for air transport

UN Number: 2984
Proper Shipping Name: Hydrogen peroxide in aqueous solution
Hazard Class: 5.1
Packing group: III

Section 15: Regulatory Information

Regulatory Status

Classified as Hazardous according to the Globally Harmonised System of classification and labelling of chemicals (GHS) including Work, Health and Safety regulations, Australia

Finished cosmetic products are manufactured and sold in compliance with Regulation (EC) no. 1223/2009 on cosmetic products.

Finished cosmetic products are specifically excluded from the field of application of Community laws on hazardous substances and mixtures (Regulation (EC) no. 1272/2008).
