MARKET NEED

ACHIEVING THE FLAWLESS BALD FADE

Achieving the flawless bald fade requires three steps: bald, fade, finish.

Trimmers & balding clippers cut hair to the scalp, but blades can't be adjusted to move to the next step: fading.

Clippers used for tapering and fading can be zero-gapped, but they don't get as close to scalp as trimmers and balding clippers.

Moreover, cutting to scalp can be uncomfortable for those in – and behind – the chair when balding blades leave nicks and scrapes.

With a handful of micro-innovations and the introduction of **adjustable balding blades** we're revolutionizing and simplifying the process for achieving picture-perfect bald fades.

PRODUCT DESCRIPTION

Go from bald to fade with an innovative adjustable balding blade. The Vapor™ combines a high-powered motor with the new F32 FADEOUT™ blade for rapid precision.

NEW

The new metal taper lever and housing are shaped to align with natural hand and finger placement for unmatched comfort. The rubberized **no-slip grip** material adds extra control for easy handling.

NEW

We've added more power without the weight; the Vapor weighs in at 275g making it lighter than the Magic Clip.

NEW

High-speed brushless motor with Adaptive Speed Control provides **consistent** power of 8000 RPMs through all hair types and textures.

NEW

Safe Quick Charge: 180 minutes* of consistent power from a 60-minute charge.

**still in validation testing*

F32 FADEOUT

5-STAR

SERIES

PRODUCT DESCRIPTION

With deeper, finer, and more ball-pointed teeth at a lighter weight, the **F32 FADEOUT blade** moves quickly and smoothly over pores providing an efficient and comfortable cutting experience.

NEW

Made from high-carbon steel with PVD chrome and black DLC coatings, blades are ultra-strong, rust resistant, and remain sharp up to 4x longer.*

NEW

32 Fine ball-pointed teeth glide smoothly over pores, reducing nicks and snags.

NEW

50% more teeth and 6 grams lighter than our standard blade for faster, smoother cutting.

Zero-gap adjustable for the closest cut.

**compared to standard steel*
